CURRICULUM CORNER—YEAR 2

This week we have been presenting our Materials projects to the rest of the class. In our Science lessons, we learned about the different materials bridges are made from to ensure that they are strong and sturdy, but also have a small amount of flexibility. Ropes on bridges are called suspension cables.

They are used on bridges which are designed to move slightly. This is so that if it is really windy or there is traffic, the bridge can take the strain and not break. Year 2 presented the bridges they made at home and tested the sturdiness of their project with toy cars. Well done, Year 2!

SCHOOL TRIP—HAVERING ISLAMIC CENTRE

This week, Year 2 visited the Havering Islamic Centre! We learned about the 5 pillars of Islam and how the centre helps the local community with their soup kitchen and job fairs.

We were able to see where Muslims prayed in the centre and enjoyed some snacks whilst we chatted about what we had learned.
